## From the Director's Desk

As we complete the first half of the financial year, this is the perfect time to pause and reflect on our collective journey so far.

I am proud to share that our **order booking performance has been outstanding**, a true reflection of our team's relentless effort and the trust our valued customers continue to place in us. Their confidence in our capabilities remains the strongest driving force behind our success.

At the same time, we recognize that **execution has brought its own set of challenges**. These are not setbacks but opportunities — opportunities to enhance coordination, streamline processes, and strengthen delivery excellence. Every challenge we overcome makes us more resilient and better prepared for the future.

Our customers and Supply Chain Partners (SCPs) continue to play a vital role in this growth journey. Their cooperation, responsiveness, and shared commitment have been instrumental in keeping our operations on track, even in demanding circumstances. Together, we form a **value-driven ecosystem** that thrives on trust, transparency, and teamwork.

In a rapidly evolving global defence landscape, where reliability and precision are paramount, our commitment to uncompromising quality and on-time delivery has never been more critical. The world looks to trusted partners who can deliver with excellence, and we are determined to uphold that trust in every mission we undertake.

As we move into the second half of the year, our focus remains clear — **to deliver on every promise with quality, consistency, and agility**. Let's continue to build stronger partnerships, foster collaboration, and keep our customers at the heart of everything we do.

With our team's dedication, our customers' confidence, and the unwavering support of our SCPs, I am confident that the months ahead will take us to even greater heights of excellence and achievement.

Let's move forward — **stronger, smarter, and more united than ever before**.

Warm regards,  
Mr. Haridas Dadas,  
Associate Director
